## **DETAILED ACTION**

### ***Status of Claims***

1. Claims 77-86 are pending.
2. Claims 77-86 are rejected.

### ***Information Disclosure Statement***

3. The information disclosure statement filed May 20, 2001 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered. Please note that this notice only applies to the nonpatent references that were *not* ever considered in parent application 08/484,159 as indicated by being crossed out in the IDS forms because those particular references were not received.

### ***Drawings***

4. This application has been filed with informal drawings, which are acceptable for examination purposes only. Formal drawings will be required when the application is allowed.

Art Unit: 1614

***Claim Rejections - 35 USC § 112***

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 77-86 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The bond from the nitrogen atom on the left of the formula does not clearly attach to any particular variable. In fact, this bond from the nitrogen atom attaches to the bond between the variable of  $X_m$  and R. As a result, these claims are rendered vague and indefinite.

***Obviousness-type Double Patenting***

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 77-86 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-24 of U.S. Patent No. 6,001,884. Although the conflicting claims are not identical, they are not patentably

Art Unit: 1614

distinct from each other because of the clear overlap in subject matter that exists between that which is currently claimed and the subject matter as claimed in U.S. Patent No. 6,001,884.

9. Claims 77-86 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-103 of U.S. Patent No. 6,011,068. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the clear overlap in subject matter that exists between that which is currently claimed and the subject matter as claimed in U.S. Patent No. 6,011,068.
